

## CONGRESSIS 2026 SCIENTIFIC PROGRAM

This document represents the official scientific program of the 20th edition of CONGRESSIS - International Congress for Students and Young Doctors, established to ensure a structured, coherent, and well-organized schedule of all scientific sessions included in the event.

The program is divided into thematic categories to guarantee the efficient delivery of presentations and to provide a high-quality academic experience for all participants.

According to the official schedule, the sessions will take place as follows:

- **Thursday, May 7th, 2026:** sessions dedicated to the **Posters and Fundamental & Behavioral Sciences** categories
- **Friday, May 8th, 2026:** sessions for the **Clinical Medical** category
- **Saturday, May 9th, 2026:** sessions for the **Clinical Surgical** category

For all categories except Posters, presentations must be prepared and delivered in **PowerPoint (PPT) format**. For the **Poster** category, presentations must be prepared in **A0 poster format**.

This document reflects the final structure of the scientific presentations and is intended to ensure proper coordination of all scientific presentations, facilitating academic interaction and the exchange of expertise among participants.

Additionally, please note that the order presented in this document will also represent the official order of presentations during the congress sessions, and all speakers and participants are expected to follow this sequence accordingly.

The official allocated time for presentations is as follows: for **PowerPoint (PPT) presentations**, each speaker will have **5 minutes for presentation**, followed by **2 minutes dedicated to discussion (up to two questions)**. For **Poster presentations**, each presenter will have **3 minutes for presentation**, followed by **2 minutes dedicated to discussion (up to two questions)**.

The Fundamental & Behavioral Sciences session will take place in the Duca Amphitheatre from 10:00 to 14:00. The Poster sessions will be held at the Unirea Hotel, with Poster Session 1 scheduled from 10:00 to 13:00 and Poster Session 2 scheduled from 14:00 to 17:00.

The Clinical Medical sessions will be distributed as follows: Clinical Medical 1 will take place in the Duca Amphitheatre, Clinical Medical 2 in the Cotrău Amphitheatre, Clinical Medical 3 in the Small Anatomy Amphitheatre, and Clinical Medical 4 in the Large Anatomy Amphitheatre. All sessions are scheduled to begin at 10:00 AM

Similarly, the Clinical Surgical sessions will be organized as follows: Clinical Surgical 1 will be held in the Duca Amphitheatre, and Clinical Surgical 2 in the Cotrău Amphitheatre. All sessions are scheduled to begin at 10:00 AM.

## **PRESENTATIONS**

### **I. Slideshow presentations**

What to prepare: A slideshow in .PPTX or .PDF format

Used language: English

Where to send it: [scientific@congressis.ro](mailto:scientific@congressis.ro)

Submission deadline: May 3rd

Once the presentation has been sent, it cannot be modified.

Duration: Maximum 5 minutes, followed by a 2-minute discussion with the members of the jury. Please make sure you stay within the 5-minute time limit. Exceeding the allocated time may result in being interrupted by the jury or volunteers and may lead to a potential reduction in the final score.

PowerPoint structure

- The accepted formats for the presentation are .pptx or .pdf.
- The presentation file must be named using the following structure: „Name\_Surname\_Congressis2026”.
- We recommend using a font size of at least 22 for the text.
- Avoid overcrowding slides with large blocks of text. Include only the main ideas and support them through your oral explanation.
- The use of diagrams, images, and animations is encouraged (all visual elements should be numbered).
- If you include images featuring patients, please ensure their privacy is respected by covering their eyes or face.
- All tables and graphics must include a title and a legend.

Recommended presentation structure:

- The first slide should contain: the title of the paper, the author and co-authors' names, the scientific coordinator(s), the affiliation, and the logos of both the affiliation and the congress.

- The next slide may include a table of contents. This is optional but can help the audience follow the structure of the presentation more easily.
- The following 1–2 slides should present the introduction, outlining the topic and its relevance.
- After the introduction, include approximately 10–15 slides presenting the core content of the paper in a clear and concise manner (materials and methods + results / case presentation).
- The conclusion should be presented in 1–2 slides, highlighting the key findings and the main message you want the audience to remember.
- The final slide should contain the references.

## **II. Poster presentations**

Accepted types of papers: Original Study / Review / Case Report

What to prepare: ISO A series format (A0= 841 × 1189 mm), portrait orientation, preferably printed on matte carton.

Used language: English

Submission deadline: Bring a copy of your poster between May 4th to May 6th to the SSMI headquarter, during the permanency interval 10:00-16:00.

Duration: Maximum 3 minutes, followed by a 2-minute discussion with the members of the jury. Please make sure you stay within the 3-minute time limit. Exceeding the allocated time may result in being interrupted by the jury or volunteers and may lead to a potential reduction in the final score.

## FUNDAMENTAL&BEHAVIORAL SCIENCES

Day: **May 7th**

Time interval: 10:00-14:00

Location: Duca Amphitheatre

No.	Title	Author
1	A worm's eye view of autoimmune disease therapy	Mara Elena Cotaie
2	Gut Microbiota-Driven Macrophage Polarization as a Central Regulator of Hepatocellular Carcinoma Progression	Felix-Marian Geodoiu
3	Accelerated Theta-Burst Stimulation for Rapid Reduction of Suicidal Ideation in Major Depression	Daniel Buznean
4	Advancing Ulcerative Colitis Management: Etrasimod as a Targeted Oral S1P Receptor Modulator	Alexia-Maria Costandache
5	Beyond the Genome: eRNAs as Game Changers in Gastric Cancer	Mara Elena Cotaie
6	Biomarkers in Cardiovascular-Kidney-Metabolic Syndrome: From Pathophysiology to Early Diagnosis	Sorana-Maria Dobrea
7	CAR T-Cell Therapy for Paediatric B-ALL: Recent Clinical Advancements and Future Perspectives	Gabriel-Erich Ganea
8	Cold Air Plasma for Microbial Control and Wound Healing	Ştefan Rareş Maxim
9	Dietary diversity, lifestyle and cardiovascular disease patterns across Eurasia	Axel Ashcroft Yuta Mtsuura
10	Does Interleukin-10 Suppress NLRP3 Inflammasome Activation? Mechanisms and Immunological Implications	Dan-Calin Badarau-Rata
11	Dysbiosis in the Deep: Exploring Microbiome Profiles in Chronic Rhinosinusitis With Polyps	Maria Botezatu
12	Eating Against the Clock: Chrononutrition Links to Depression in University Students	Antonella Malfara
13	Exploring The Pain-Modulating Properties Of Nefazodone In Preclinical Models	Matei-George Ilie
14	Facial Fat Compartments and Prenatal Facial Skeletogenesis: Developmental and Genetic Perspectives	Mircea-Dan Apopei-Rusu
15	Fiction or Reality: 3D Bioprinting as a solution for Terminal Heart Failure	Andreea-Maria Scînteii

16	GLP 1 Receptor Agonists: Beyond Glycemic Control Toward Cardiovascular Protection	Cristina-Daniela Cozma
17	Injury prevention at work using mandatory warm-up routines	Stefan Grigoras
18	Post-D2 Era: Xanomeline-Trospium and the Future of Schizophrenia Treatment	Ionuț-Alexandru Ghicu
19	Precision from Plasma: The Liquid Biopsy Revolution in Paediatric Oncology Surveillance	Gabriel-Erich Ganea
20	Protein Glycation in Human Disease: Molecular Mechanism and Clinical Insights	Razvan Lisa
21	Rethinking Prion Therapy: Tetracyclines vs Pentosan Polysulfate for Creutzfeldt-Jakob Disease	Adelina Maria Butincu
22	Revisiting PTSD treatment: The therapeutic potential of MDMA-assisted therapy	Amalia Ștefana Artenie
23	Starve, Then Strike: GLUT1 Inhibition Sensitizes Triple-Negative Breast Cancer to Doxorubicin	Andreea-Laura Antohi
24	The Vicious Gut-Brain Cycle: Infections, Antibiotics, Nutritional Sufficiency And Young Adults' Health	Iustina-Gabriela Mihăianu
25	Therapeutic Senolysis in Age-Related Pathologies	Dan-Sergiu Docea

## POSTERS I

Day: **May 7th**

Time interval: 10:00-13:00

Location: Unirea Hotel, Cuza Centru Hall

No.	Title	Author
1	The Longevity Code within: Gut Microbiome Influences on Healthy Ageing	Mais Alsuleiman
2	3D Printing vs. Conventional Preoperative Planning in Orthopedic Surgery: A Systematic Review	Radu Jantea
3	A Challenging Case of Suspected Testicular Neoplasm in Klinefelter Syndrome	Diana Alexandra Chilug
4	A Fixed Valve but Limited Walking: Peripheral Arterial Disease After TAVI	Irina Moisuc
5	A Rare Jejunal Grade 3 Neuroendocrine Tumor in a Young Patient	Iulia Mărieș
6	A Rare Severe Periorbital Presentation of Herpes Zoster Ophthalmicus	Robert-Teodor Horga
7	AI Chatbots in Mental Health: Balancing Accessibility and Clinical Risk	Pascu Petronela
8	Beyond a Tight Wrap - Severe Dysphagia After Fundoplication Revealing Systemic Sclerosis	Jean Paul El-Nabbout
9	Beyond the brain's barrier - Nanotechnology in Gaucher Disease	Radu Nicolae Belu
10	Beyond Valve Replacement: A Journey Through Cardiovascular Rehabilitation	Călina-Anastasia Tănase
11	Blue Baby Syndrome Caused by Severe Nitrite-Induced Methemoglobinemia: A Case Report	Denisa-Elena Ursu
12	Cardiopulmonary Exercise Testing: A Tool to Assess Improvement after Cardiac Rehabilitation	Anda-Ilinca Potlog
13	Clinical Challenges in Decompensated Heart Failure with Multimorbidity	Mara-Ioana Răucescu
14	Coexistence of Glioblastoma and ADPKD: Insights from a Rare Clinical Case	Mihai-Vlad Herțescu
15	Coexisting Holoprosencephaly and Myelomeningocele with Early Neonatal Survival	Elisabeta Sasu
16	Congenital Ichthyosis in Early Infancy Complicated by Severe Respiratory Failure: Case Report	Denisa-Maria Cotan
17	Deep Vein Thrombosis Recurrence in Ulcerative Colitis Patients – Risks and Triggers	Miruna Ștefania Ciulei

18	Delayed Diagnosis of Colon Adenocarcinoma After Inadequate Screening	Rares Bugoi
19	Developing a Low-Cost Spectrometer for Optical Emission Characterization of Air Cold Plasma	Ștefan Rareș Maxim
20	Diagnosing Piriformis Syndrome: Ultrasound Identification of a Hidden Sciatic Nerve Variant	Iulia Ioana Marțian
21	Dual Popliteal Pathology: Baker's Cyst and Lipoma Mimicking Bilateral Disease	Alexia-Maria Ruscanu
22	Dysautonomia Revealing Seronegative Primary Sjögren Syndrome in a Patient with Hypermobility Ehlers-Danlos	Denisa Pintilie
23	Emergency Surgery for Life-Threatening Hemorrhage in Advanced Tonsillar Carcinoma: A Case Report	Eduard-Teodor Todea
24	From Acute Onset to Anastomotic Stricture: A 18-Year Crohn's Disease Journey	Andreea-Bianca Boghean
25	High-Risk HPV Infection in an Immunocompromised Young Woman: Diagnostic and Therapeutic Considerations	Daphne Lockhart
26	Hypertrophic Cardiomyopathy in Athletes: Sudden Cardiac Death and Diagnostic Challenges	Rares Bugoi
27	Intraoperative Uterine Inflammatory Changes in Pregnancy: Consequences of Pelvic Inflammatory Disease	Gabriela Hăvîrneanu
28	Managing Treatment-Refractory Rheumatoid Arthritis and Crohn's Disease: A Dual-Targeted Therapeutic Approach.	Rania El amri Benazzouz
29	Navigating Complexity: Multidisciplinary Management of Congenital Frontal Hemangiomas	Andreea Laura Gheorghiescu

## POSTERS II

Day: **May 7th**

Time interval: 14:00-17:00

Location: Unirea Hotel, Cuza Centru Hall

No.	Title	Author
1	One Patient, Three Pathologies, One Operation: Laparoscopic Uro-Surgical Approach	Andrei-Petru Molodoi
2	One Shot, Two Realities: Global HPV Efficacy and Romanian Vaccine Hesitancy	Andreea Miruna Sarghie
3	Optimizing Neuropathic Pain Control in Phantom Limb Syndrome: A Case Report	Cristina Butnariu
4	Osimertinib Management in Metastatic EGFR-Mutant NSCLC: A Clinical Challenge	Anastasia-Florina Andrici
5	PCOS and Quality of Life: Metabolic Drivers and Management	Alexia Bretean
6	Personalized Approach In Membranous Glomerulonephritis: From Diagnosis To Personalized Treatment	Adelina Maria Butincu
7	Plurimalformative Cerebral Syndrome: Diagnostic Power of MRI in Common Adult Symptomatology	Ruxandra Maria Petrariu
8	Preoperative Endovascular Embolization in Giant Meningiomas: New Opportunities in Surgical Management	Andreea-Florina Tanasă
9	Primary immunodeficiency syndromes of adult patients	Andrei Rusu
10	Recurrent Voluntary Foreign Body Ingestion: A Vicious Cycle of Surgical Emergencies	Lorena-Delia Dascaluic
11	Retinal AI Meets the Real World - Generalisation, Dataset-Shift, and Out-Of-DISTRIBUTION Risk	Jean Paul El-Nabbout
12	Reversing T Cell Exhaustion: A New Frontier in Cancer Immunotherapy	Carina Maria Ciocan
13	Severe Clostridioides difficile Colitis with Multiorgan Failure in Alcohol Withdrawal	Mara-Ioana Răucescu
14	Severe complication of vaginal prolapse: transvaginal bowel evisceration	Elena-Alexandra Panaite
15	Severe Pediatric Lupus Nephritis with a Deceptive Gastrointestinal Onset: A Case Report	Maria Lorena Badea

16	Silent Inheritance: Familial Hypercholesterolemia Uncovered in Two	Lidia Cretu
17	Silent, but Deadly: Accidental Reveal of Retroperitoneal Leiomyosarcoma - A Case Study	Anisia-Elena Grigoraş
18	Sleep Deprivation and Neurodegeneration: Mechanistic Links to $\beta$ -Amyloid Accumulation and Dementia Risk	Maria-Ecaterina Savin
19	Some Face Hardships Early On: Untangling a Case of Neonatal Sepsis	Elena-Ramona Flueraş
20	Targeted Horizons: Adjuvant VMAT-DIBH in Distal Cholangiocarcinoma	Tudor-Mihai Chiriac
21	Th1/Th2 inflammatory pathways overlap in hypersensitivity pneumonitis and severe eosinophilic asthma	Patrik - Marian Szekely
22	The Great Mimicker - Pseudomyxoma Peritonei Presenting as Ovarian Cancer	Andreea-Cristiana Horoi
23	The management of Chronic spontaneous urticaria	Adnana Paşca
24	Theragnostic in pNET - An integrated approach using dual-isotope PRRT	Maria - Claudia Ivasciuc
25	Two Decades of Silent Growth: A 17-cm Fibroepithelial Polyp Revealed by Trauma	Maria Galan
26	Uncovering the Unexpected: A Case of Mature Ovarian Teratoma in Adolescence	Sofia-Ioana Hanganu
27	Underneath appendicitis: Intraoperative surprise of a mesenteric desmoid tumor	Denisa Creţan
28	Unmasking Dyke–Davidoff–Masson Syndrome: Acute Confusion Revealing a Rare Chronic Neurological Condition	Daria Vreme
29	When Ambiguous Genitalia Signals an Endocrine Emergency	Luca Guzu
30	When Appearance Misleads: 46,XY DSD Due to SRD5A2 Variant	George Atănăsoaie
31	When Cardiac Disorders Converge: A Complex Case of Non-Obstructive Hypertrophic Cardiomyopathy	Iulia Ioana Marţian
32	A Hot Fix for Pancreatic Pseudocysts: AXIOS to the Rescue	Ştefania-Iulia Anderco

## CLINICAL MEDICAL I

Day: **May 8th**

Time interval: 10:00-14:00

Location: Duca Amphitheatre

No.	Title	Author
1	"Heart attack" without coronary lesions: mystery of a transient ventricular dysfunction	Matei-George Ilie
2	Achieving A Firm Grip: Over-The-Scope Clip For Post-Polypectomy Bleeding	Daria-Ştefania Postolache
3	A Clinical Paradox: When Thick Walls Meet Low Voltage in AL Amyloidosis	Andreea-Demetra Nedelcu
4	A Hidden Trigger: Secondary HLH Masking Occult Retroperitoneal Non-Hodgkin Lymphoma	Soham Paikaray
5	A Silent Esophagus, a Critical Outcome: Severe Achalasia Leading to Cardiorespiratory Arrest	Ana-Maria Negru
6	A Weight Too Heavy for the Spine Alone	Syed Ahmed Mohammad
7	Acute Pericardial Effusion with Mixed Etiology: A Case Report	Elena Niţu
8	Air Where It Should Not Be: ERCP Perforation With Widespread Emphysema	Andreea-Laura Antohi
9	An unexpected autopsy diagnosis: signet-ring cell carcinoma originating in the prostate	Ioana-Ecaterina Barnea
10	Beyond Amputation: Functional Reconstruction in Pediatric Macroductyly	David-Vasile Puşcaşu
11	Beyond Symptoms: The Importance Of Colorectal Cancer Screening	Dimitrie Stefan Gologan
12	Beyond the Broken Heart: Exploring the Intersection of Emotion and Cardiac Health	Antonio Constantinescu
13	Beyond the Joints: Unmasking Renal Complications in Ehlers-Danlos Syndrome	Miruna-Maria Alexandroaie
14	Beyond the Tumor: Severe Complications in Pediatric Posterior Fossa Astrocytoma	Ilinca-Ioana Ganga
15	Beyond Tumor Control: Radiotherapy-Induced Effects on Tumor-Free Skin and Soft Tissues	Maya Panaitescu

16	Blurred Boundaries: A Case of Multiple Sclerosis Masquerading as Guillain-Barré Syndrome	Maria Vasilache
17	Bone fragility in a Young Patient: Diagnostic Clue for Cushing's Disease	Ileana Grigore
18	Bone Scintigraphy: The Apex Imaging Technique for Prostate Bone Metastases	Andreea MALOFI
19	Born With The Consequences: The Clinical Impact of Prenatal Alcohol Exposure	Stefana Benchea
20	Broken Bones, Failing Heart, Hidden Clot	Diana Cărăușu
21	Can Gut-on-Chip Technology Finally Solve Inflammatory Bowel Disease? A Narrative Review	Javeria Khan
22	Cardio-Metabolic Syndrome and Obstructive Sleep Apnea- a Frequent Association	Maria-Teodora Nedelcu
23	CD19-Negative Relapse Following CAR T-Cell Therapy in B-ALL	Khalid Haddad
24	Cellular senescence in breast cancer: from tumoral suppression mechanism to therapeutic target	Luciana-Dumitrița Murăreanu
25	Chemotherapy-induced peripheral neuropathy – Challenges in pharmacological management	Alexandru Agheorghiesei
26	Chronic Thromboembolic Pulmonary Hypertension in Hereditary Thrombophilia: Clinical Course and Management	Cristiana Bleorțu
27	A Rare Coexistence of Ovotestis and Malignant Germ Cell Tumor	Andreea Ștefaroii
28	Beyond the Ventilator: EXTEND as a New Biological Standard for Periviable Support	Alexandra-Elena Moldoveanu

## CLINICAL MEDICAL II

Day: **May 8th**

Time interval: 10:00-14:00

Location: Cotrău Amphitheatre

No.	Title	Author
1	From Digital Friend to Visual Foe: Screen Time versus Ophthalmology During COVID-19	Andrada-Denisa Munteanu
2	Clinicoradiological Correlation in Acute Weber Syndrome: A Case Report	Aya Riba
3	Colorectal Cancer in Children – What`s Different?	Axel Ashcroft Yuta Mtsuura
4	Complex Percutaneous Transluminal Coronary Angioplasty in Acute Myocardial Infarction with Multivessel Disease	Adrian Gavrilut
5	Cutaneous Angiolupoid Revealing Multisystem Sarcoidosis	Andreea Ștefaroii
6	Cutaneous Clues to Early Anti-MPO Renal Vasculitis	Andreea Puha
7	Double Danger: Successful Endoscopic Resection of Dual Internal Laryngoceles	Maria Botezatu
8	Duodenal Neuroendocrine Tumor masked by Refractory Dyspepsia	Dimitrie Stefan Gologan
9	Early Clinical Evidence of CRISPR-Phage Therapy for Precision Antibacterial Strategies	Daria-Ioana Virgă
10	Early Recognition of Wellens' Syndrome as a Marker of Critical LAD Stenosis	Flavius-Daniel Vacaru
11	Epstein-Barr Virus and Cytomegalovirus coinfection causing rare acute hepatitis in a child	Bianca-Maria Ciobanu
12	Frank's Sign: When the ear hears the heart suffering	Bianca-Ioana Ilișoi
13	From Biermer anemia associated with autoimmune Hashimoto thyroiditis to "Myxedema Madness"	Mohamad Gnaiem
14	From Cryptogenic Stroke to Occult Melanoma: Cardiac Metastasis Reveals the Hidden Culprit	Hiba Foughali
15	From Inoperable to Resectable: Dual HER2-Blockade in Locally Advanced Male Breast Cancer	Kimia Taran
16	From Methotrexate Failure to Biologic Success in Pediatric Psoriasis	Victoria Golovatii

17	From Surgery to Immunotherapy: Multimodal Management of Merkel Cell Carcinoma	Denis-Iulian Calancea
18	From symptom to syndrome: the challenges of chronic cough	Maria Bucșă
19	From Valve Intervention to Functional Recovery: CPET Assessment After TAVI	Constantin-Bogdan Ivan
20	Gene Therapy: Precision Medicine in the Era of Genetic Editing	Ilinca Axinte
21	Goodpasture Syndrome: From Pulmonary Hemorrhage to Dialysis Dependency	Răzvan-Radu Tirla
22	Gut-Brain Axis Dysregulation and Inflammatory Pathways in Major Depressive Disorder	Medeea-Andreea Florea
23	Hepatocellular Carcinoma in HBV-HDV Coinfection Despite Minimal Fibrosis	Iman Saleem
24	Hidden Gluten, Overt Damage: A Case Study of Multisystemic Autoimmunity	Alexandra-Gabriela Iosub
25	Hidden in plain sight- Steinert Disease and its Multisystem Involvement	Livia Nicoleta Bogatu
26	Histotripsy Mechanics: Increased Tumor Antigens and Decreased Metastatic Recurrence Successfully Achieved	Maria Țirdea
27	HIV Reimagined: Lentiviral Gene Therapy in the Treatment of SCID	Daria-Ioana Virgă
28	From Breath to Sight: The Unexpected Ocular Impact of Cystic Fibrosis	Mara-Teodora Zară
29	Impact of socio-demographic factors on cognitive test scores in multiple sclerosis patients	Cristina Butnariu

## CLINICAL MEDICAL III

Day: **May 8th**

Time interval: 10:00-14:00

Location: Small Anatomy Amphitheatre

No.	Title	Author
1	Infectious Optic Neuritis in Lyme Neuroborreliosis	Beatrice-Emilie Mironescu
2	Inhalable Nanoparticles for Respiratory Therapy: From Drug Delivery to Precision Medicine	Ruxandra Cojocaru
3	Limbal Conjunctival Melanoma with Corneal Invasion: A Rare Ocular Surface Presentation	Iasmina-Maria Colescu
4	Liver Biopsy in Unveiling the Overlooked: Asymptomatic Cases of Ductal Plate Malformations	Ana-Maria Negru
5	Megaesophagus Under Pressure: Achalasia Pushing the Limits	Elena-Letiția Negru
6	Mesenchymal Stem Cell Therapy: Toward Regenerative Treatment of Heart Failure	Luca-Sebastian Smântână
7	Mitigating Cisplatin-Induced Acute Kidney Injury: Evidence-Based Preventive Strategies	Miruna-Maria Alexandroaie
8	Molecular triage after HPV screening: dual stain or DNA methylation?	Donea Gabriel-Sebastian
9	Morphologic evolution of bilateral Wilms tumor after suboptimal response to chemotherapy	Matei Tanasă
10	Navigating the Storm: Severe Hyponatremia and Iatrogenic Hypothyroidism in Dual Immunotherapy	Teodor Gemanariu
11	Neurovascular Origins of Personality: Clinical Insights From a Fronto-Parietal Arteriovenous Malformation	Alexia Teodora Tuvencu
12	Non-Rheumatic Streptococcal Acute Myocarditis masquerading as Acute Coronary Syndrome	Alexandra-Miriam Temneanu
13	Rapidly Progressive Bulbar Dermatomyositis After Nivolumab in Metastatic Gastric Cancer	Iman Saleem
14	NSTEMI in Complete Situs Inversus: Complex PCI Challenge	Eric Mihai Țibichi

15	Obstructive Jaundice Caused by Walled-Off Necrosis Managed by Endoscopic Ultrasound Guided Drainage	Cătălin-Andrei Bejan
16	Ocular Syphilis Mimicking Branch Retinal Artery Occlusion: A Diagnostic Challenge	Alissia Nicoleta Pilatec
17	One Mutation, Three Battlegrounds: A Rare Case in a Young Male	Smaranda Dumitroaia
18	Plasma p-tau217 and p-tau231: Identifying Alzheimer's Disease Decades Before Clinical Onset	Katherine Mohr
19	Predicting Post-TIPS Overt Hepatic Encephalopathy Using Preoperative PHES and Stroop Testing	Bianca Elena Țobîcă
20	Prevention Of Hereditary Cancer: A Highly Debated Path In IVF	Mara Doroftei
21	Primary Cardiac Lymphoma: Multimodality Diagnosis and Contemporary Management Strategies	Mălina Alecu
22	Primary Sclerosing Cholangitis And Indeterminate IBD: A Rare and Challenging Association	Rami Jenane
23	Pulmonary Graft-versus-Host Disease After Hematopoietic Transplantation	Laura Gabriela Crangă
24	Pulmonary Thromboembolism in the Frail Oncologic Patient: Between Guidelines and Clinical Reality	Maria-Alexandra Palaghita
25	Radiation proctitis: when radiotherapy becomes the source of complications	Sara-Caterina Apostol
26	Rare Recurrence Of Achalasia After Multimodal Therapy: A Case Report	Daria-Elena Pop
27	Remarkable response to radiotherapy in a heavily pretreated BRCA2-mutated metastatic CRPC	Alissia Nicoleta Pilatec
28	NSAID-Induced Enteropathy: A Therapeutic Challenge in Anticoagulated Patients	Mohamad Gnaiem

## CLINICAL MEDICAL IV

Day: **May 8th**

Time interval: 10:00-14:00

Location: Big Anatomy Amphitheatre

No.	Title	Author
1	Ruptured Abdominal Aortic Aneurysm: CT Diagnosis of a Silent Killer	Delia Andreea Sofian
2	Severe Atherosclerotic Disease. A Complex Revascularisation Strategy Between Endovascular and Surgical Approaches	Louis Revy
3	Sex and Age Based Differences in CGM Outcomes Following Diabetes Camp	Andrei Reurean Pintilei
4	Sexual dysfunction impacts quality of life in multiple sclerosis patients	Stefan-Dragos Ignat
5	Should all patients with benign prostate hyperplasia and urinary retention undergo surgery?	Ana Tanasa
6	Splenic Lymphoma Mimicking Autoimmune Disease: A Diagnostic Challenge	Daria-Elena Pop
7	Stem Cell Therapy in Ischemic Stroke: A New Era in Neuroregeneration	Nectarie Carp
8	Syncytial lymphoid proliferation in a patient with complex congenital malformations: diagnostic challenge	Vlad-Cristian Bordea
9	Tafamidis: A Breakthrough Therapy for the Complex World of Transthyretin Cardiac Amyloidosis	Maia-Ioana Boureanu
10	The Future of Endometriosis Management: Integrating Organ-on-a-Chip Technology	Oana-Georgiana Briceanu
11	The Gut–Lung Axis: A New Clinical Frontier in Bronchial Asthma Modulation	Alexandru Frunză
12	The Impact of Vitamin D Deficiency on Renin–Angiotensin–Aldosterone System in Arterial Hypertension	Andreea Puha
13	The Ischemic Cascade: Multisystem Sequelae and Multifocal Neuropathy in Aortic Dissection	Daria-Maria Ștefănescu
14	The Partitioned Body: Identity-Specific Somatic Manifestations and Diagnostic Pitfalls in Dissociative Disorders	Alexandra-Elena Moldoveanu
15	The Skin as a Mirror: A Rare Case of Muir-Torre Syndrome	Ioan Cioran
16	The Trojan Horse 2.0: Using Nanorobots to Breach the Fortress of Malignant Tumors	Mihaela Coroabă

17	Unexpected Caseous Mitral Annular Calcification in a Patient with Plurivascular Atherosclerosis	Julia Roxanna Bartos
18	Unusual Etiology Of Acute Vertigo In A Cochlear-Implanted Patient: A Pneumovestibulopathy Case	Dora Cozma
19	Valve-in-valve infective endocarditis with severe prosthetic dysfunction: multimodality imaging and staged management	Victor-Alexandru Poraicu
20	Venetoclax in Acute Myeloid Leukemia: Increased Remission Rates with Combination Regimens	Giullya - Miruna Gâdei
21	Vitamin D in Preventing BPPV Recurrence: Going Beyond the Epley Maneuver	Denisa Mihaela Bunescu
22	When Arrhythmia Reveals a Giant Hiatal Hernia-Case Report	Alexia Teodora Tuvencu
23	When Genetics Load the Gun: A Rare Endometrial Carcinoma in Lynch Syndrome	Maga Daniela
24	When IgA Vasculitis Shows All Its Faces: One Child's Course	Nicoleta-Mădălina Halip
25	When Standard Anticoagulation Fails: Lessons from Rapidly Progressive Pulmonary Embolism	Daria Axinia
26	When Surgery Contraindicates Thrombolysis, but Cardiac Arrest Demands It	Maria Galan
27	Wilms Tumor: Histopathological and Immunohistochemical Challenges in Pediatric Oncology	Mihai-Bogdan Combei
28	When Cortisol Attacks: Rare Multisystem Complications in Cushing Syndrome	Mais Alsuleiman
29	The Breath After the Silence: Understanding the Lazarus Phenomenon	Iustin Antal

## CLINICAL SURGICAL I

Day: **May 9th**

Time interval: 10:00-14:00

Location: Duca Amphitheatre

No.	Title	Author
1	A Decade Later: Funnel Retinal Detachment and the Threat of Sympathetic Ophthalmia	Alice Foia-Colescu
2	A Missing Piece in the Clinical Presentation of Severe Hypercortisolism: Cutaneous Necrosis	Eduard-Ionut Mihalache
3	Accelerated Eccrine Carcinoma Arising From a Caustic Chemical Marjolin Ulcer	Alexia-Cătălina Matei
4	An Ectopic Menstrual Pathway: Scar Endometriosis with Utero-Parietal Fistula	Ioana-Bianca Agapi
5	An Unlucky Patient: Recurrent Forearm Fractures and the Importance of Proper Management	Anda-Ilinca Potlog
6	Anastomotic Leak in Colorectal Surgery	Abdel-wahab AlAtout
7	Are we caught in a squeeze?- a systematic review on Vaccum-Assisted-Therapy	Bogdan Bugeac
8	Between Blast and Blindness: Complex Surgical Management of Ocular Trauma	Alina Pisarenco
9	Beyond Debulking: Reconstructive Challenges in Giant NF1 Plexiform Neurofibromas	Ioana-Bianca Agapi
10	Beyond the Borderline- Early Recurrence of a Clear Cell Ovarian Tumor	Livia Nicoleta Bogatu
11	Bicuspid Aortic Valve Challenges: Aortic Valve Replacement and Ascending Aortic Reconstruction	Adrian Gavrilut
12	Breaking the Limits of Clipping: Endovascular Treatment of Vertebral Aneurysm	Hiba Foughali
13	Carotid Endarterectomy in a Patient Diagnosed with Moyamoya Disease	Cristian-Alexandru Profire
14	Chasing the Cause of Fasting Hypoglycemia: Doege–Potter Syndrome	Anastasia-Parascheva Sandu
15	Diagnostic Challenge: A Case of Mesothelial and Tubal Cyst Mimicking Ovarian Pathology	Sofia-Ioana Hanganu
16	Double-Lumen VAC Therapy: Optimizing Minimally Invasive Management of Upper Gastrointestinal Perforations	Edwina-Elena Viciriuc

17	Elevated Inflammatory Biomarkers were Associated with Unstable Atherosclerotic Plaques in Carotid Stenosis	Adelina-Maria Zokarias
18	Elevated Leukocyte–Glucose Index Predicts Adverse Events After Abdominal Aortic Aneurysm Repair	Sofronia Ciotu
19	Emerging from the Shadows: The Unseen Steps in Restoring Vision After Polytrauma	Raluca Novac
20	Enhancing Outcomes: Lipostructure in the Management of Oncologic Surgery Sequelae	Catherine-Teodora Costan
21	External Vacuum Therapy: A Lifeline for Recurrent Esophageal Fistula and Retroesophageal Abscess	Mara-Teodora Zară
22	Fecaloma-induced recto-utero-peritoneal fistula: an unusual surgical case	Florena-Carmen Bîtcă
23	Five-Year Outcomes Of An Innovative Reno-Femoral Bypass In An Oncology Patient	Maria Urleşeanu
24	Floating Elbow: When One Joint Loses All Its Anchors	Eduard-Ionut Mihalache
25	From Palliative to Curative: Total Heart Remodeling Success	Miruna-Elena Cătea
26	From Severe Endometriosis to Motherhood: A Surgical Success Story	Miruna Butnariuc
27	Haste makes waste- a current understanding of the Fillet Flap	Bogdan Bugeac
28	Human Touch versus Robotic Precision: Open Prostatectomy vs Robotic Surgery-A Systematic Review	Costica Cristian
29	Immune Privilege Under Threat: Regulatory T Cells in High-Risk Corneal Graft Outcomes	Razvan Lisa
